Bed Head Unit

SIBLINI

MEDICA

Bed Head Unit

A NEW approach to hospital bed lighting combining functionality and esthetics.

Body

- Made of extruded aluminum powder painted in white with 3 compartments for low voltage, power supply lines and medical gases.

Indirect lighting

- Asymmetrical reflector that directs the light up and out towards the ceiling for general room lighting.
- 1x18W, 1x36W, 2x18W, 2x36W fluorescent lamp combinations are possible.

Direct lighting

- Used for the patient's reading and doctor's examination. The prismatic lens allows for uniform lighting distribution.
- 1x18W or 2x18W fluorescent lamp combinations are possible.

Night light

- 15W incandescent lamp for discrete night-time security.

Electricals

- A wide range of combination to choose from: power socket (British, French, German), telephone socket, pull-switches, on/off switches, nurse call system.

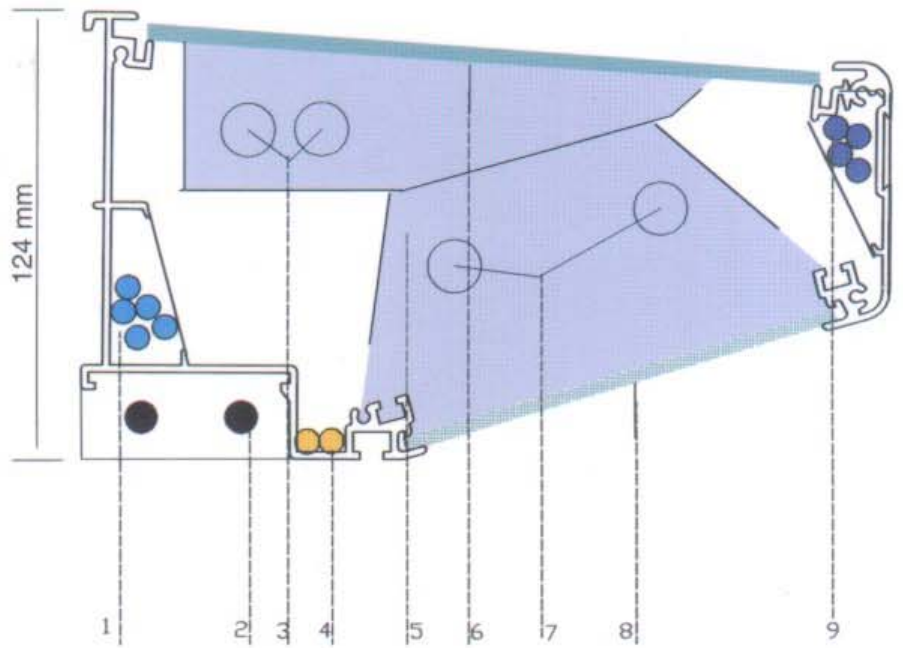

Gases

- A separate compartment in the lower section for easier access to the medical gas system.

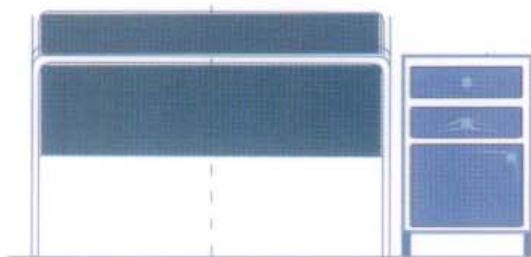

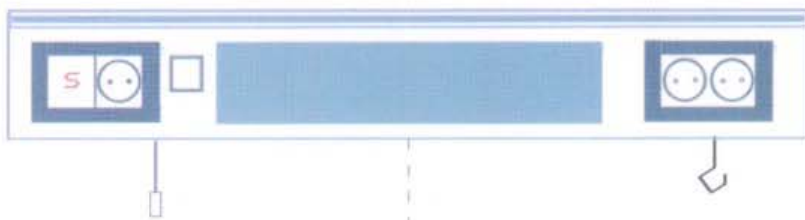

Channel

- Integrated in MEDICA's bed head unit and available in different lengths.

- 1 Power supply lines
- 2 Reservation for gas system
- 3 Indirect lighting
- 4 Telephone line
- 5 Reflector
- 6 Clear plexiglass diffuser
- 7 Direct lighting
- 8 Prismatic diffuser
- 9 Low current lines

Medica front view

- 2x36 W Indirect Fluorescent Lamp
- 2x18 W Direct Fluorescent Lamp
- Power socket
- Light switch for indirect light and telephone socket
- Nurse call system
- Pull cord for direct lighting
- Hanging hook
